Project Title: Expense Tracker

Features of the Application

✓ **User-friendly menu** for easy navigation

✓ **Persistent data storage** (saves expenses to a file and loads them on startup)

✓ **Categorization support** for better organization

✓ **Expense reports** to track spending trends

How It Works

1. **Run the program**

2. **Add expenses** (amount, category, description)

3. **View all expenses** in a structured format

4. **Generate an expense report** to see total spending per category

5. **Exit the application** (data is saved automatically)

Would you like additional features such as **budget limits** or **expense deletion**? 🚀
